HIV Prevention Market Manager

What is the HIV Prevention Market Manager?
Through the HIV Prevention Market Manager (PMM) Project, AVAC and CHAI seek to facilitate an efficient and effective rollout of HIV prevention products. The PMM works with partners across the prevention research to rollout spectrum to expand the portfolio of options and ensure appropriate products are available, accessible and used by those who need them most.

Why is the PMM Needed?
There is often a delay in moving products from the research and development stage to rollout, uptake and impact. The PMM project addresses this lag by identifying critical gaps and overlaps, facilitating coordination, compiling and disseminating information and providing strategic technical support. Working with the full range of actors and initiatives, the PMM project makes clearer where strategic investments in prevention products are needed and supports accelerated introduction, consistent, correct uptake by end users and informs future product development.

Research to Rollout Continuum
The five main PMM project objectives mapped across the research to rollout timeline:

- Prevention Market Manager Objectives
  - Understand the end user
  - Understand the payers of prevention
  - Accelerate introduction of prevention products
  - Improve R&D pipeline
  - Global coordination

### Research & Development

- Basic
- Preclinical
- Clinical
- Implementation Science
- Introduction Initiatives
- Rollout

- PxRx
- Improve R&D pipeline
- Accelerate introduction of prevention products
- Ksh
- Understand the payers of prevention
- Global coordination
## PMM Goal
Support accelerated development and efficient use of prevention tools to maximize reduction of new HIV infections.

### OBJECTIVE

<table>
<thead>
<tr>
<th>Understand the end user</th>
<th>ACTIVITIES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Share learning on critical prevention product issues of adherence, segmentation and uptake by end users, with focus on AGYW</td>
<td>Assess the scope of the end-user project landscape and identify and fill gaps through research or partnership with others working in the space.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Understand the payers of prevention</th>
<th>ACTIVITIES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ensure availability of sustainable resources for HIV prevention</td>
<td>Determine what effective prevention will cost, and support payers to make thoughtful decisions around prevention investments.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Accelerate introduction of prevention products</th>
<th>ACTIVITIES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Determine what makes product introduction successful, support scale up and apply lessons for future products</td>
<td>Support and document the critical steps to product introduction such as country policies and guidance, fast-track product registration, supply chain strengthening, resource mobilization, commodity forecasting and more.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Improve the R&amp;D pipeline</th>
<th>ACTIVITIES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Improve acceptability and accessibility of priority HIV prevention products in the pipeline</td>
<td>Work with developers early in the development process to ensure products meet needs of end users; develop market forecasts and work with modelers to estimate cost and impact of introducing new tools; and anticipate unique challenges that each product will need to resolve.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Global coordination</th>
<th>ACTIVITIES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Find the best mechanisms to create efficiencies across all parties working in prevention</td>
<td>Gather, synthesize, and disseminate information for strategic decision making among product developers, funders, governments and implementers.</td>
</tr>
</tbody>
</table>
